Index of SURVEYING AND MAPPING, Volume XL

This index includes all principal articles and all news items, shorts, as well as the subjects carried under each of the departments that were published in Volume XL (1980) of SURVEYING AND MAPPING. The principal articles are indexed by subject and author; other items by subject and author and by commenter or reviewer as applicable. For the convenience of persons referring to unbound numbers of the Journal, the number of the issue has been included after the volume number in order to avoid the necessity of referring to the following table. The issues published in 1980 are as follows:

March	pages 1-107 + Index, i-ix	No. 1
June	pages 108-268	No. 2
September	pages 269-364	No. 3
December	pages 365-460	No. 4

Indices of Bound Volumes of Technical Papers from ACSM Annual and Fall Technical Meetings, 1980

ACSM bound volumes of technical papers are often listed with ACSM Publications Available under Literature and Map Reviews in the ACSM Journal, SURVEYING AND MAPPING, and also in the ACSM BULLETIN. The volumes include most of the papers presented at the conventions, which are seldom reprinted in SURVEYING AND MAPPING. These volumes are considered a *must* for every professional surveyor, geodesist, or cartographer's library. Bound volumes of both ACSM and ASP technical papers are given to each registrant at the spring and fall conventions for convenience in following the speakers' presentations and for background prior to presentation.

Bound Technical Papers of the ACSM 40th Annual Meeting

St. Louis, Mo., March 9-14, 1980, 492 pp. + i-xvi front material

[*Ed. Note*: Unpublished papers are listed alphabetically by author(s) at end of paper-author(s) cross-reference listing. These papers were received too late for publication or were not sent in advance of the convention. Abstracts submitted in advance for acceptance of paper were not published.]

Bound Technical Papers of the ACSM Fall Technical Meeting

Niagara Falls, N.Y., October 7–10, 1980, 394 pp.

[*Ed. Note*: This volume of bound technical papers was not numbered consecutively but was keyed by division, session, paper presentation position within session, and numbered consecutively by individual paper. The first key is the Division and in one case a Committee: LS (Land Surveys Division), CS (Control Surveys Division), CD (Cartography Division), MS (Interdivisional Marine Surveying and Mapping Committee); next is a numeral designating the session in sequence of the particular Division/Committee; then comes the alpha designation, meaning the order of sequence of the paper in a given session; and the last numeral is always 1, inasmuch as each paper was numbered consecutively, starting with 1. In the volume, all LS sessions appear first, followed by CS, CD, and MS.]
